

Conflict Minerals Statement

4.01.2016

Electronic components contain variety of different metals including tantalum (coltan), tin (cassiterite), tungsten (wolframite) and gold. *Dodd-Frank Wall Street Reform and Consumer Protection Act* as well as many international customers, require companies to file an annual disclosure where they indicate if their products include metals sourced from Conflict Region.

As some of our used components contain conflict minerals, we aim to cooperate only with suppliers who are committed to recognize the policy described in the *OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas*. Our suppliers have confirmed their respect against above mentioned policies and we hereby can declare that, known to us, **all our products contain only metals that are sourced outside Conflict Region or from Conflict Region which have been certified "conflict free"**.
